

# ROUNAK KHANAM

## Full Stack MERN Developer

raunakkhanam0207@gmail.com | Indore, India | linkedin.com/in/rounak-khanam-20ab58284 | github.com/rounakkhanam06

### PROFESSIONAL SUMMARY

Full Stack MERN Developer with hands-on experience building, deploying, and scaling production web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in designing REST APIs, JWT authentication, role-based access control, and Redis caching, with experience integrating third-party services such as Razorpay and Shiprocket. Comfortable managing end-to-end production deployments on VPS servers with PM2 and Nginx, maintaining 99.9% uptime. Strong focus on clean, maintainable code and scalable, user-focused solutions.

### TECHNICAL SKILLS

|                     |                                                                       |
|---------------------|-----------------------------------------------------------------------|
| Languages           | JavaScript, Java                                                      |
| Frontend            | React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Three.js |
| Backend             | Node.js, Express.js, REST APIs, JWT Authentication, RBAC              |
| Databases & Caching | MongoDB, Mongoose, Redis                                              |
| DevOps & Tools      | Git, GitHub, Docker, Nginx, PM2, VPS / Linux, Postman                 |

### PROFESSIONAL EXPERIENCE

|                                                                                                |                                                              |
|------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| <b>Full Stack MERN Developer</b><br><i>Appzeto (Budgetaddaa E-Commerce Services Pvt. Ltd.)</i> | <b>March 2025 – Present</b><br><i>Indore, India (Hybrid)</i> |
|------------------------------------------------------------------------------------------------|--------------------------------------------------------------|

- Engineered full-stack features for live enterprise and e-commerce platforms using React.js, Node.js, Express.js, and MongoDB.
- Integrated Redis in-memory caching for frequent API requests, session management, and rate limiting, cutting database query load and latency.
- Managed end-to-end production deployments, VPS server setup, and PM2 process management, achieving 99.9% application uptime.
- Designed and integrated scalable RESTful APIs, JWT authentication, role-based access control (RBAC), and payment & courier webhooks.
- Architected responsive, mobile-first frontend interfaces with reusable React components and optimized asset delivery.
- Collaborated with cross-functional teams to translate business requirements into clean, production-ready codebases.

|                                                                                        |                                                     |
|----------------------------------------------------------------------------------------|-----------------------------------------------------|
| <b>Backend &amp; MERN Stack Intern</b><br><i>Robotronix Engineering Tech Pvt. Ltd.</i> | <b>Internship (1 Month)</b><br><i>Indore, India</i> |
|----------------------------------------------------------------------------------------|-----------------------------------------------------|

- Gained hands-on experience in backend development, routing architecture, middleware pipelines, and asynchronous JavaScript with Node.js and Express.js.
- Built, tested, and documented REST APIs covering complete CRUD operations, request validation, and structured error handling.
- Designed database schemas, relationships, and data validations using MongoDB and Mongoose ODM.
- Conducted API testing and debugging workflows using Postman, following industry-standard clean coding practices.

### PROJECTS

#### VedHunt — Enterprise Business Website & CRM Platform

React.js, Node.js, Express.js, MongoDB, RBAC

- Built an end-to-end enterprise CRM platform for lead ingestion, client management, employee workflows, and website content administration.
- Implemented role-based access control (RBAC), a real-time lead pipeline, and employee productivity tracking.

#### VruMarket — Modern Digital Marketplace

React.js, Node.js, Express.js, MongoDB, Redux

- Developed a multi-vendor digital commerce platform with seller storefronts, product catalogs, and automated order tracking.
- Built admin and vendor dashboards for real-time order monitoring with webhook-based checkout notifications.

#### Speedoo — 10-Minute Quick Commerce Delivery App

React.js, Node.js, Express.js, MongoDB, Geolocation

- Built a quick-commerce grocery and essentials delivery platform with geolocation-based dark store routing and dynamic ETA computation.
- Engineered a high-concurrency order-processing backend to handle peak instant-order traffic with real-time tracking.

#### Aramish Shoes — Premium Footwear E-Commerce

React.js, Node.js, Express.js, MongoDB

- Developed a luxury footwear e-commerce storefront with a custom cart architecture, wishlisting, and persistent guest sessions.
- Integrated shipping and courier tracking hooks for real-time dispatch updates.
